Online Competitions
Domain to be confirmed and supplied by client

DOCUMENT

30 September 2026
Version 1.5 - complete feature scope

1. Agreement summary

This document lists **everything included** in the Elite Premium Raffle Framework build for OFFSET BRITAIN LTD: a white-label online competitions business with skill-based entry, staff back office, self-hosted data, and production marketing tools. Commercial fee and payment schedule are agreed separately; this PDF is the **feature contract**.

2. What you get (applications included)

- **Main customer website** - competitions, cart, checkout, account, winners, legal pages, referrals
- **Staff admin dashboard** - full operations, settings, exports, draw studio
- **Central API backend** - one engine powers website, admin, webhooks, and jobs
- **Self-hosted MongoDB** - all customer, order, ticket, and competition data on your VPS
- **Self-hosted Redis** - caching, rate limits, performance under traffic
- **Object storage** - S3-compatible media for images and uploads

3. Public website - marketing & content

- Configurable homepage sections (hero, ending soon, categories, winners, calls to action)
- Competition catalogue and detail pages with galleries, video, countdowns, category filters
- Featured and pin-to-top competitions on listings
- Public winners gallery and homepage winner carousel (staff controls order and visibility)
- FAQ, about, how-it-works, contact form (with abuse protection)
- Legal pages: terms, privacy, cookies, responsible play
- Free postal entry page with address from compliance settings
- Referral link landing pages (/r/code)
- Public ticket entry lookup and per-competition entry views
- SEO per page plus site-wide SEO defaults (titles, descriptions, Open Graph, referral share images)
- Cookie consent banner and marketing consent on accounts
- Umami product analytics (optional env configuration)

4. Public website - cart, checkout & payments

- Multi-competition shopping cart with live availability
- Skill-based question gate before purchase (legal compliance)
- Quick-add ticket quantity buttons (admin-defined presets)
- Volume discount tiers by cart value (named tiers, min/max, percentage off)
- Promo / discount codes at checkout
- Referral codes and referral discounts on qualifying orders
- Apply referral reward tickets where configured
- Guest checkout when compliance allows; guest-to-account merge
- Payment methods (admin-enabled): card via **Cashflows**, wallet-only / zero-balance checkout
- Pay with card, site credit wallet, cash wallet, or any combination
- Instant win reveal modal at checkout when a ticket triggers a hidden prize
- Checkout success and failure flows with clear error messaging
- Order confirmation emails with ticket numbers
- Cloudflare Turnstile on auth forms (bot protection)

5. Customer accounts & dashboard

- Sign up, login, email verification, forgot / reset password, magic link login

- Google social sign-in; optional anonymous browse sessions
- Profile with avatar upload, contact details, addresses
- My orders, my tickets / entries, my wins (main draw, instant win, bonus prizes)
- Site credit wallet and cash wallet balances with transaction history
- Cash wallet top-up and withdrawal requests (per rules)
- Referral hub: personal code, share link, tier progress, stats, leaderboard-style metrics
- Responsible play: monthly spend limits, self-exclusion, request to lift exclusion (admin review)
- Marketing preferences linked to Klaviyo when enabled
- Web push notification opt-in and preferences (when campaigns enabled)

6. Competition management (admin)

- Full competition builder: title, slug, pricing, schedules, draw date, status workflow (draft, active, paused, ended, pending draw, drawn, cancelled)
- Ticket limits: minimum before draw, maximum pool, max per user, holds and sold counts
- Main prize details, prize cost for accounting, cash alternative for winners
- Private, community, featured, hero / appear-first flags; cash-only competitions; referral-reward competitions
- Categories (multi-select), rich HTML descriptions, main image, gallery, competition video
- Landing video upload with frame extraction for previews
- Skill question per competition or import from global Q&A library
- Duplicate competition with instant prizes, discounts, and media
- Soft delete / restore competitions
- End-draw workflow and undo draw with reason history
- Scheduled job moves competitions toward draw when due

7. Instant win system

Hidden prizes on specific ticket numbers. Wins trigger at checkout before the main draw.

7.1 Prize types (included for OFFSET BRITAIN LTD)

Type	What happens
Site credit	Credited instantly to Site Credit Wallet
Cash	Cash prize recorded; payout via admin / cash wallet processes
Physical prize	Fulfilment by staff; shipping and winner comms

- Reusable instant prize templates (library) and per-competition assignments
- Prize name, value, image, winning ticket numbers (manual or auto-generated)
- Instant win emails; claimed / unclaimed fulfilment queue in admin
- Instant win analytics, filters, CSV export
- Option to block credit-card checkout when instant wins are in cart (compliance setting)

8. Bonus prizes (milestone draws)

- Bonus awards tied to percentage of tickets sold (e.g. extra prizes at 50%, 75%, 100%)
- Public progress display on competition pages
- Automatic milestone firing plus admin retrigger for pending fires
- Bonus win fulfilment queue and customer notification emails

9. Two wallet systems

	Site credit wallet	Cash wallet
Use	Prizes, referrals, admin credits, optional credit bundles	Real money: deposit, spend, withdraw
Checkout	Full or partial payment	Full or partial payment
Withdraw	Platform credit only (not cash-out)	Request queue; admin approve or auto rules; fees configurable
Accounting	Not counted as card revenue until spent on tickets	Real-money ledger with audit trail

- Admin balance adjustments with compliance audit log
- Pending vs available balance handling where applicable

10. Winners, draws & draw studio

- Pick main draw winners by ticket number; manual winner entry; CSV import
- Winner profiles: display name, location, photo, testimonial, guest auto-claim
- Claim / unclaim, soft delete / restore, win notification emails
- Competitions pending draw alerts on dashboard
- **Livestream draws** - in-admin list of competitions ready to draw
- **Draw Studio** (fullscreen) - draw grid, queue, recent winners, confirmation dialogs
- **Google Sheets integration** - sync sold entries to live draw sheet, editor whitelist, Drive folder settings

11. Referrals & affiliate marketing

- Referral codes, referee discount, tiered ticket rewards for referrers
- Activity windows, grace periods, minimum first-order spend, anti-abuse (self-referral block, caps)
- Admin: referral purchases ledger, reassign / restore records, referral network mindmap
- Dashboard widgets: top referrers, tier distribution, summary KPIs
- Affiliate traffic sources (Meta, TikTok, Google Ads, others) with click ID capture
- Server-side conversion postbacks on signup and purchase (configurable URLs, CPA defaults)
- Postback logs for admin review

12. Marketing & analytics (production included)

- **Google Analytics 4** - browser tags and/or Measurement Protocol server events
- **Facebook Meta Pixel** - standard ecommerce events with consent
- **Facebook Conversions API (CAPI)** - server-side purchase tracking
- **Klaviyo** - list sync from marketing consent, lifecycle email integration
- **Umami** - lightweight on-site analytics for your team
- SEO admin: defaults, OG images, referral share image
- Optional marketing webhook URL for external automation

13. Email & push notifications

- Email provider configuration (transactional SMTP / API); test send from admin
- Templates: welcome, verify email, magic link, password reset, order confirmation
- Win notification, instant win, bonus prize win
- Referral reward emails (awarded, allocated, redeemed)
- Contact form notification to staff; self-exclusion override decision to user
- Admin notification campaigns with scheduling
- Web push broadcasts (batched) and device subscription management

14. Merchandise shop (optional, future)

A separate merchandise shop module (product catalogue, shop cart, checkout, and shop orders) is **not included in this scope**. If OFFSET BRITAIN LTD ever needs it, Hostyler will add and enable that module **at no extra charge**.

15. Compliance & responsible play

- Master compliance toggle and configurable rules engine at checkout
- Age verification (date of birth) with minimum age
- Monthly credit-card spend cap (scheme-aware)
- User monthly spend limits with cooldown on increases
- Self-exclusion for a minimum period; user override requests; admin approve / deny
- Postal free entry address and prominence settings
- Guest checkout on/off; minimum order value; zero-subtotal order policy
- Compliance audit log per user; staff compliance panel on user records
- Public and dashboard responsible play content

16. Admin dashboard & staff tools

- KPI dashboard: users, competitions, revenue, tickets, recent orders, recent winners
- Global search: competitions, orders, users, promos, categories, winners, tickets, referrals
- Roles: **Admin** (full settings) vs **Manager/Staff** (operations, draws, catalogue where permitted)
- Promo codes: create, bulk activate/deactivate/delete, export
- User admin: verify email, grant/revoke staff roles, delete accounts (bulk actions)
- Orders (competition ticket purchases) with payment metadata context
- Homepage layout editor - reorder and toggle sections
- Payment methods panel: enable Cashflows, local/wallet; sandbox/live; credential test; webhooks
- CSV exports: users, orders, winners, promos, competitions, instant prizes, categories, instant wins
- First-time admin setup flow and emergency access procedures (documented)

17. Media library

- Central media browser for competitions, winners, instant prizes, site content
- Presigned upload to S3-compatible storage; image processing
- Usage finder (where a file is referenced) and safe delete guards

18. Security, performance & operations

- HTTPS, secure session cookies, separate admin origin recommended
- Rate limits on auth, payments, contact (Redis-backed when enabled)
- Content Security Policy for payments, analytics, Turnstile, social scripts
- Redis cache for catalogue and settings; live tickets and wallets never stale-cached
- Background jobs (cron): check draws due, bonus milestones, abandoned order cleanup, scheduled notifications, ticketing anomaly checks
- Sentry error monitoring in production
- Health checks for database and Redis; build version endpoint
- Idempotent checkout and webhook handling; order fulfilment engine with ticket allocation

19. AI integration

A smart system built into the platform that learns from your live data and helps you run competitions with less guesswork.

19.1 Admin and operations

- Analyzes users, visit patterns, behaviour, spending, basket habits, competition performance, and referral activity
- Surfaces trends and alerts so staff see what is working and what is slowing down
- Suggests what to upload next (competitions, prizes, creatives, promos) based on your audience patterns
- Recommends timing, pricing bands, and catalogue mix aligned with historical demand on your site

19.2 Customer website (same AI engine)

- The same AI layer runs on the public site to personalize layout, ordering, and highlights in a subtle way
- Influences discovery and engagement indirectly (for example which competitions appear first, relevant nudges, and content emphasis) without aggressive pop-ups or hard selling
- Respects compliance, consent, and responsible play settings at all times

20. Deliverables from Hostyler

- Production deployment on client VPS (HTTPS, MongoDB, Redis, storage, all apps)
- **Full database** and **all application files** on your infrastructure (you own the deployment)
- Configured payment gateways and marketing tags (GA4, Pixel, Klaviyo) with consent
- Staff admin accounts, handover documentation, cron job URLs
- Hostyler.com client account: support tickets, invoices, downloads
